Kitchen Expansion

Phase 2
Project Cost: $1,000,000

The Challenge

As Camp He Ho Ha works toward welcoming more campers each summer, our kitchen must grow alongside our dining space. As of now our kitchen can support 350 meals a day, however, following the Dining Hall Expansion, Phase Two will expand and equip the kitchen to accommodate increased meal volumes and support additional campers, staff, and volunteers. Increasing kitchen capacity is an essential part of Camp's long-term growth plan and will ensure our food service operation can continue to meet the complex needs of our campers.

Our Solution

Camp He Ho Ha will reposition and expand the commercial kitchen into additional space and equip the larger facility to support increased meal production. The project will include a new kitchen space, commercial equipment, additional food preparation and storage areas, improved workflow, and the tools required to efficiently prepare and serve meals for a larger camp population.

Why It Matters

Increasing camper capacity requires more than additional beds and program spaces, we must also be able to safely and efficiently meet the complex nutritional needs of our campers. A larger, properly equipped kitchen will remove a significant operational barrier to growth and ensure meal service can expand alongside our camper programs.

Who It Benefits

- 740 campers annually
- Individuals with physical & developmental disabilities
- Families & caregivers
- Staff & volunteers
- Community rental groups

Project Outcomes

- Improved food safety
- Increased efficiency
- Better meal quality
- Reduced maintenance costs

Partner Recognition

- Onsite Recognition
- Website
- Social media
- Annual Report
